KIM Hyoung-Jin is a Professor in Paper Science and Head of the Paper Process/Environmental Analysis Laboratory at Kookmin University in Seoul. He has a Ph.D. in Paper Science at the University of Manchester Institute of Science & Technology. He is active in numerous professional organizations in Korea such as the Korea Technical Association of Pulp and Paper Industry, the Korean Society of Industrial & Engineering Chemistry, the Korean Society of Conservation Science for Cultural Heritage and the Society for Standards and Standardization.

Claude LAROQUE is Senior Lecturer for a Master's program in conservation at Panthéon-Sorbonne University, where she is head of the Book and Paper Department. During the last 15 years, her main research interests have been the conservation of transparent papers, the conservation of collections in tropical countries (she long been involved in a teaching program in Africa) and the technology of papermaking in Asia. The research she is currently doing on Asian papers is being conducted at the CRCC.

Centre de recherche sur la conservation des collections (CRCC), 36 rue Geoffroy Saint-Hilaire 75005 Paris, France

Hajime OHTANI received his Ph.D. in 1985 from the Department of Synthetic Chemistry, Graduate School of Engineering, Nagoya University. He then joined Nagoya University as an Assistant Professor (1986–1995). He became an Associate Professor in 1995 and moved to the Department of Materials Science and Engineering, Nagoya Institute of Technology and was promoted to full Professor in 2005. He has published more than 150 original papers and about 100 reviews and book chapters, mostly on the pyrolysis of polymers. He has also served on the Advisory Board of the Journal of Analytical and Applied Pyrolysis (Elsevier).

Nagoya Institute of Technology, Department of Materials Sciences and Engineering, Nagoya 466-8555, Japan

Takayuki OKAYAMA is a Professor at Tokyo University of Agriculture and Technology. He graduated with a MS from the same university in 1976 and gained a Ph.D. in Agriculture from the University of Tokyo in 1988. He specializes in pulp and paper science and technology, especially paper recycling. He was employed as a post-doctoral fellow at the Empire State Paper Research Institute, Syracuse, USA from 1989 to 1990. Since 1991, his research field has extended to the study of the degradation of paper and conservation processes.

Tokyo University of Agriculture and Technology, Institute of Agriculture, Division of Natural Resources and Ecomaterials, 3-5-8 Saiwai-cho, Fuchu, Tokyo 183-8509, Japan
